AUTOMATIC 8 PROJECTOR

REVOLUTIONARY NEW 8mm MODEL

AUTOMATICALLY

- Threads
- Projects
- Rewinds

KODAK Automatic 8 Projector

less than \$110

Here is a completely automatic 8mm model featuring a new concept in projection ease. This projector threads, projects, and rewinds the film for you — all automatically. Once the film is fed into the automatic threader, it isn't necessary to touch the machine again. The projector threads itself right onto the take-up reel and you just sit back and enjoy the show. At the end of the reel, the projector turns the projection lamp off and the room light on, automatically rewinds the film (a full 15-minute movie in approximately 20 seconds), and then shuts off the motor—ready for your next reel. Has an enclosed, permanent 200-foot take-up reel—no reel arms and no reel-storage problem. You can change reels so quickly your shows seem almost continuous.

The KODAK Automatic 8 Projector has a unique bar control for forward, reverse, and “still” projection. There is provision for rapid manual rewind when desired—for example, when you want to project only part of a reel. Projector comes with a supply of KODAK Rewind Film Clips, which user can easily attach to a roll or reel of processed 8mm film to provide automatic rewinding.

Projector has an $f/1.6$ lens with extra-fine focus control and DCH Tru-Flector lamp for bright, detailed screenings. Comes with an 8-foot detachable cord that stores in a specially built compartment. Built-in-case construction with convenient carrying handle. Geared elevation control. Projector is permanently lubricated at the factory and never needs oiling.

The

KODAK Automatic 8 Projector

offers these features and many others...

Automatic Threading

Just turn it on and insert the end of the film into the slot at the top of the projector. Then sit down and enjoy the show. It's as simple as that because the projector threads itself right onto the permanent take-up reel.

Automatic Rewind

A metal clip (quantity of which is supplied with the projector) is attached to the end of the film, providing the necessary tension to automatically trip the projector mechanism onto rewind. At the time of rewind, the projection lamp is automatically turned off. The rapid rewind takes about 20 seconds for a 15-minute movie.

Automatic Room-Light Control

The Automatic 8 Projector will actually turn your room light off when you start showing your movies, and back on again when the reel of film is completed. All that is necessary is to plug your floor lamp into the receptacle on the projector and sit back to enjoy extra-bright movies automatically projected.

KODAK PROJECTION AIDS

KODAK Rewind Film Clip

Attaches end of film to reel, providing the necessary tension to automatically trip the KODAK Automatic 8 Projector into rewind.

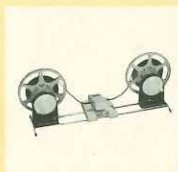

KODAK Projection Screen (30 x 40)

This de luxe screen—30 x 40-inch beaded surface—is ideal for movies. Its tripod legs open automatically for quick setups.

BROWNIE Projection Screen (22 x 30)

Bright glass-beaded surface . . . 22 x 30 inches. Just right for average home movie showings. Designed for table-top use.

KODAK PRESSTAPE Editing Outfit

For 8mm and 16mm films. Accepts 200- and 400-foot reels. Includes rewind, PRESSTAPE Splicer, supply of PRESSTAPES.

KODAK PRESSTAPE Movie Splicer

Dry splicer for 8mm and 16mm films. No water, no cement! Provides a notched splice. PRESSTAPES included.

KODAK Movie Reels and Cans

Assemble your 8mm movies on 200-foot reels for longer uninterrupted showings. Store them in film cans for protection.
